LandscapeTotem

122.1200 LandscapeTotem for flat screens 50 - 52 inch

The flat screen totem is especially suitable for information purposes like in large shopping malls or at airports and train stations. We also experience the solutions being implemented in for example supermarkets, where Digital Signage solutions are used for commercial use and as mean to influence the purchasing behaviour of the consumer. Both the front- and back plate are removable for service or maintenance. The monitor is attached by means of an in height and dept adjustable interface. The back side of the totem is fitted with ventilation holes, which are also suitable for adding blister hooks as point-of-sale. Optional a lockable lower cabinet can be added for integrating a PC or mediaplayer.
